
adbrite 1.5 installation error

Posted by vasiliiyb - 2008/06/03 12:48

Gents,

Trying to install the latest adbrite on joomla 1.5 (latest as well)

Getting the following installer error:

* It was not possible to copy the selected file.

* JInstaller::install: Failed to copy file:

/home/www/websitedirectoryreplaced/tmp/install_48458ff076433/images/mod_multi_mode_adbrite_15.png to

/home/www/websitedirectoryreplaced/modules/mod_multi_mode_adbrite_15/images/mod_multi_mode_adbrite_15.png

THANKS FOR YOUR HELP! :)

Hi there,

I am having the same problem, have you had an answer back??

would love to know what to do!

Well,

That module I never resolved. I ended up using another module in legacy mode ...

Hope this helps

Same error message. Can we get this fixed? Looks like it's probably a typo somewhere....

hi,

i m not sure if it s because i developed and tested it on Windows OS and that s why dont have such problem.

I tried to modify the source code. Can help to test it again pls ? Let us know whether works or not. Thanks

Download again from here

Hi Sunwu,

Thanks so much, works perfectly now. Do you think I am having trouble with YouCMSAndBlog WYSIWYG IDE and World Wisdom Module for the same reason. I tried downloading these and they both say that the setup xml file is not there??

again thanks
you are a genius!

hi,

thanks for testing it out. at least now, solve problem for users in linux hosting env.

YouCMSAndBlog is not Joomla component. It is standalone program like Dreamweaver.
You only need to unzip and read the readme.txt how to make it run. in a future, i may create a video clip (tutorial) to simplify the installation and how to use.

World Wisdom for J-15 possibly the same problem, i have tried to fix it, pls try to download here again.

Let everyone knows if it s working. thanks.

Hi,

Thanks for everything World Wisdom is now up and running on my site and I am trying to work my way through YouCMSAndBlog.

As I said before, you are a genius, thanks so much.
