
Joomla installation with this?

Posted by 4thdesign - 2007/12/25 12:54

Is there anyway that I can install the bubble game into my joomla website?

perhaps I am not quite understanding but as far as i was aware, you can only play or install these games on your homepage of igoogole?

This would be awesome to have this game (and others) on my website where my members can play this game???

Any ideas if this can be done please?

Thanks guys :)

that's right. you only can play it on iGoogle Pages :)

I plan to create a Joomla component for it and maybe plus another popular online games also. Will post it here onccce ready.
