
RSS Feedburner - can't install -

Posted by Carolyn - 2009/06/20 06:40

Help

I can't install the RSS Feedburner. (although i have successfully installed several other Joomla modules).
When I try transferring and installing the file I get the following message : "JFolder::create: Ne peut pas créer le dossier
Attention ! - Le fichier n'a pas pu être déplacé" i.e. the file can't be transferred and Jfolder cant be created. I don't
know what I've done wrong.Can anybody help me ??:dry:

Success! I've managed to install it, but I don't understand where to find the FFID. :S Can you tell me where I should be
looking ??
