
FB Like Box (existing FB site vs. New Page)

Posted by spv9587 - 2010/07/23 05:02

Hello

OK I'm confused with the config on the FB Like Box module for Joomla. If I have an existing Facebook site (600+ friends), can I use this site in the setup of the module OR do I have to create a NEW PAGE to set this up..? If it's the latter, will I still see my 600+ friends or will it be considered a brand new FB site..?

I think that's my confusion - any help would be great.

Thanks.
